

MMS Profile stitch

The MPS-T is a recent addition a very successful range of automatic profile stitching machine from MMS UK. Designed by engineers who have been involved with the development of tie tipping machines for over 25 years this machine has been specifically manufactured to provide a very fast and reliable method of producing perfect tie tips without the need for highly trained operators.

MPS-T

The Tie Tipper

Low cost templates produce perfect closed or open end neckties.
Intermittent feed produces perfect results even on finest silks and polyesters.
In just a few minutes unskilled operators can produce perfect tie tips.
High productivity, high quality tips with the same features as hand sewing.

Features

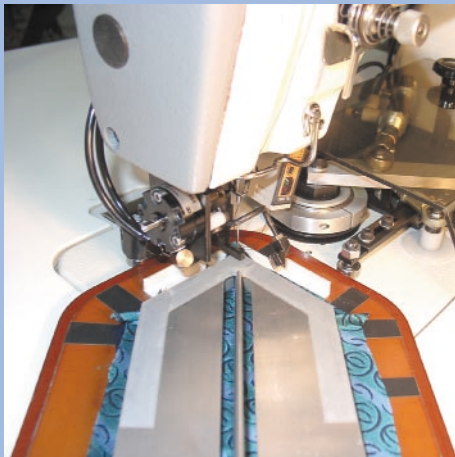

PLC system to control and monitor the sewing cycle.

Photocell detection of tapes on template for precise control of start and stop positions, corners and the amount of condensed stitches.

Pneumatic wiper to automatically move the corner pleats to ensure perfect points.

Automatic turn mechanism to control the template at the corners.

Table extension and shelf option for fabric storage and template handling.

Sewing head

Pfaff 483 with underbed thread trimmer

Sewing motor

Efka single phase DC

Sewing speed

Up to 2600 stitches per minute

Electricity supply

Single phase 220-240 V

Air supply

5 bar./

Dimensions

760 x 1300 mm

Weight

Net - 180kg
Shipping - 240kg

Consumption

1.5 metre cubed/hour

Needle type

135-35

Thread type

Core spun polyester
cotton

Table height

any sewn button

Production

Up to 2000 tips/8 hours
depending on handling
efficiency
